(57) **ABSTRACT**

There is provided a medicament dispenser for use with plural
elongate form medicament carriers, each having multiple
distinct medicament dose portions carried thereby, the dis-
penser having a dispensing mechanism for dispensing the
distinct medicament dose portions carried by each of the
plural medicament carriers. The mechanism comprises a
receiving station for receiving each of the plural medicament
carriers; a release for releasing a distinct medicament dose
portion from each of the plural medicament carriers on
receipt thereof by the receiving station; an outlet, positioned
to be in communication with the distinct medicament dose
portions releasable by said a release; and an indexer for indi-
vidually indexing the distinct medicament dose portions of
each of the plural medicament carriers.
